2000-2001 WASHINGTON STATE TUITION AND FEE REPORT

January 2001

Introduction

By state law, the Higher Education Coordinating Board (HECB) is charged with recommending state tuition and fee policies to the Governor and Legislature. As part of its analysis, Board staff conducts an annual survey of tuition and fee rates at public colleges and universities in all 50 states to determine how Washington State tuition and fees compare both nationally and with other Western states. In addition, staff examines how tuition and fees at individual Washington institutions compare with tuition and fees charged by their respective “peer” institutions.

A joint legislative and executive study group, in consultation with the HECB, adopted a national comparison “peer” group for each of the following: 1) the University of Washington (flagship), 2) Washington State University, 3) comprehensive institutions, which include Central, Eastern and Western Washington Universities, 4) The Evergreen State College, and 5) the Washington community college system.

The Board has conducted a national survey of tuition and required fees at public colleges and universities for more than 30 years. Undergraduate and graduate tuition and fees are based on data from 215 and 195 public colleges and universities, respectively. Required fees are fees paid by all full-time students and do not include any optional fees such as parking or health care unless paid by all full-time students.

In the past, the Board has completed two reports: 1) a national comparison of tuition and fee rates and 2) an overview of tuition in Washington. This year, we’ve combined the two reports into one and also included an analysis of how Washington tuition and fees compare with other Western states. Following is a summary of how 2000-2001 tuition and fees at Washington colleges and universities compare with other Western states, with all 50 states, and with peer institutions.

Key Findings

Washington Resident Undergraduate Students

- **Pay the fourth highest tuition and fees** among students attending comprehensive universities in the 15 Western states.
- **Pay the third highest tuition and fees** among students attending the flagship universities in the 15 Western states.

- **Pay slightly less than the national average** for tuition and fees at public comprehensive and research colleges and universities.
- **Pay lower tuition and fees** than students attending peer institutions.

Washington Nonresident Undergraduate Students

- **Pay the highest tuition and fees** among students attending comprehensive universities in the 15 Western states.
- **Pay the fourth highest tuition and fees** among students attending the flagship universities in the 15 Western states.
- **Pay significantly more than the national average** for tuition and fees at public comprehensive colleges and universities.
- **Pay more than the national average** for tuition and fees at the University of Washington and less than the national average at Washington State University.
- **Pay higher tuition and fees** at the comprehensive universities, and The Evergreen State College, and lower tuition and fees at the research universities than the respective peer group average.

Washington Resident and Nonresident Graduate Students

- **Pay the second highest resident tuition and fees** among students at public colleges and universities in the 15 Western states (research and comprehensive universities).
- **Pay significantly more than the national average** for resident and nonresident tuition and fees at public colleges and universities.
- **Pay significantly higher nonresident tuition and fees** than students at peer institutions.

Washington Resident and Nonresident Community College Students

Residents

- **Pay significantly higher than average tuition and fees** at community colleges in the 15 Western states.
- **Pay less than the national average** for tuition and fees at community colleges.

Nonresidents

- **Pay the second highest tuition and fees** among community college students in the Western states.
- **Pay significantly more than the national average** for tuition and fees among community college students.

I. 2000-2001 WASHINGTON STATE TUITION AND FEES

A Comparison with Other Western States

This section of the report compares tuition and fees at Washington public colleges and universities with institutions in 14 other Western states, which are members of the Western Interstate Commission for Higher Education (WICHE). WICHE member states include Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming.

The summary table below compares Washington tuition and fee rates with those of other WICHE states. Please note that the comprehensive universities include Central, Eastern and Western Washington Universities. The Evergreen State College is represented within its own peer group and, consequently, is represented in the Peer Comparison section.

Section IV in this report (WICHE States Tables 1 through 10) provides a more detailed regional perspective on tuition and fee rates and increases from the most recent five years. Tables 1 through 8 display historical and current academic year tuition and required fee rates for full-time resident and nonresident undergraduate and graduate students at public four-year colleges and universities in the Western states. Tables 9 and 10 display state averages for community colleges in each of the Western states.

WASHINGTON TUITION AND FEE RATES COMPARED WITH WICHE STATES 2000-2001

	<u>UNDERGRADUATE</u>		<u>GRADUATE</u>	
	<u>Resident</u>	<u>Nonresident</u>	<u>Resident</u>	<u>Nonresident</u>

Dollar Difference	218	1,725		
Percent +/- WICHE Average	15.3%	36.4%		

A National Comparison

The national comparison of tuition and fee rates is divided into three categories: 1) universities, 2) colleges and state universities, and 3) community colleges. In Section IV, National Tables 1 through 4 represent tuition and fee rates at the public flagship university in each state. Public comprehensive universities and colleges are represented in Tables 5 through 8. Tables 9 and 10 display state averages for community colleges.

Compilation of averages has been consistent over time and has dealt with the “university of” in each state (Tables 1 through 4) and state averages of those public colleges and universities (Tables 5 through 8) since 1968-1969. Undergraduate and graduate tuition and fees for public colleges and universities are based on data from 215 and 195 public colleges and universities, respectively, in all 50 states. Although not all public institutions are included in this survey, the averages and changes over time and the same set of institutions offer consistency and the large number of institutions provides a close approximation of state averages.

The following summary tables provide an overview of the relationship of tuition and fee rates at Washington institutions to national averages. More detailed data tables, available in Section IV, provide a national perspective on tuition and fee rates and increases over the most recent five years. Each table shows Washington State’s ranking nationally. Tables also provide the one- and four-year percentage increases for each state.

WASHINGTON TUITION AND FEE RATES COMPARED WITH NATIONAL AVERAGES 2000-2001

A Comparison with Peer Institutions

In 1988, the Higher Education Coordinating Board undertook a study to develop peer groups reflecting a national perspective. Concurrently, a special joint legislative and executive study group was appointed to review the higher education master plan funding recommendations, with peer comparison groups identified as one of its areas of study. The Joint Study Group and the Board worked together and adopted the following peer policies:

1. The Carnegie Commission's classification of institutions is used as the basis for selecting comparison groups for Washington institutions of higher education.
2. The national comparison group for the **University of Washington** is all public institutions in the Carnegie classification Research Universities category 1 with medical schools.
3. The national comparison group for **Washington State University** is all public land grant universities in the Carnegie classification Research Universities categories 1 and 2 with veterinary schools.
4. The national comparison group for **Central, Eastern, and Western Washington Universities** is all public institutions in the Carnegie classification Comprehensive Colleges and Universities category 1.
5. The national comparison group for the **Washington community college system** is all state community college systems.

In 1990, the Higher Education Coordinating Board adopted a peer group for **The Evergreen State College** using the Carnegie Commission classification of institutions. The Board screened a composite category of public institutions in the Comprehensive I and Liberal Arts II classification and selected peer institutions based on size, similarities of degrees awarded, and other characteristics common to The Evergreen State College.

The summary table on the following page shows tuition and fee rates at Washington institutions compared to those of respective peer groups. Peer comparison tables display peer groups for the University of Washington, Washington State University and The Evergreen State College. Peer institutions for Washington comprehensive universities, with the exception of The Evergreen State College, are represented in Tables 5 through 8 in Section IV – National Comparisons. Washington community colleges are represented in Tables 9 and 10, also in Section IV – National Comparisons.

In addition to undergraduate and graduate tuition and fees by respective peer groups, the annual tuition and fee rates survey collects data for professional tuition categories. Tables 9 through 16 in Section IV – Peer Comparisons provide a comparison of Washington institutions and their respective peer group, beginning with the University of Washington and the professional programs of medical, dental and law. Tables 15 and 16 display Washington State University's Veterinary Medicine resident and nonresident tuition and fee rates as compared to their national peer group.

II. TUITION HISTORY IN WASHINGTON STATE

Historical Overview

1977-1995: Legislature Links Tuition Rates to the Cost of Instruction

Between 1977 and 1995, the Legislature established tuition rates as a percentage of the cost of instruction. In 1977, when this approach was enacted by the Legislature, a Carnegie Commission study, Who Pays? Who Benefits? Who Should Pay? determined that nationally tuition covered 24 percent of the cost of instruction at public higher education institutions. The Commission recommended that this proportion be increased to 33 percent within 10 years.

Under this “cost-sharing” approach, the student contributed a portion of the cost and the state provided the remainder. Cost-sharing assumes that both the student and society benefits from having an educated and productive citizenry.

To determine undergraduate and graduate instructional costs., the Legislature directed the Higher Education Coordinating Board to develop and perform a cost study every four years.¹ Using cost study data, the HECB transmitted to the institutions the cost basis upon which tuition would be established.

1995-1999: Legislature Sets Tuition in Statute

In 1995, the Legislature removed the direct link to the cost of instruction and instead set tuition in statute as dollar amounts for each public institution. Although 1995 legislative intent stated that the tuition increases of 1995-1996 and 1996-1997 were a “transition measure until final action is taken in 1997,”² the practice of specifying dollar amounts was continued through the 1997-1999 biennium.

Tuition increases since 1995 have mirrored expected increases in the per capita personal income (PCPI), although a formal link to PCPI was not established in statute. Tuition amounts (or percentage increases) specified in statute have referred only to the “tuition” portion of tuition and fees. Additional fees, i.e., services and activities fees and technology fees, may be assessed. State statutes establish maximum amounts that can be charged for these additional fees – which vary by institution.

The Legislature also directed the HECB to continue to conduct the cost study and submit “approved undergraduate and graduate educational costs to the several boards of regents and trustees of the state institutions of higher education by November 10 of each even-numbered year...”³

²RCW 28B.15.031.

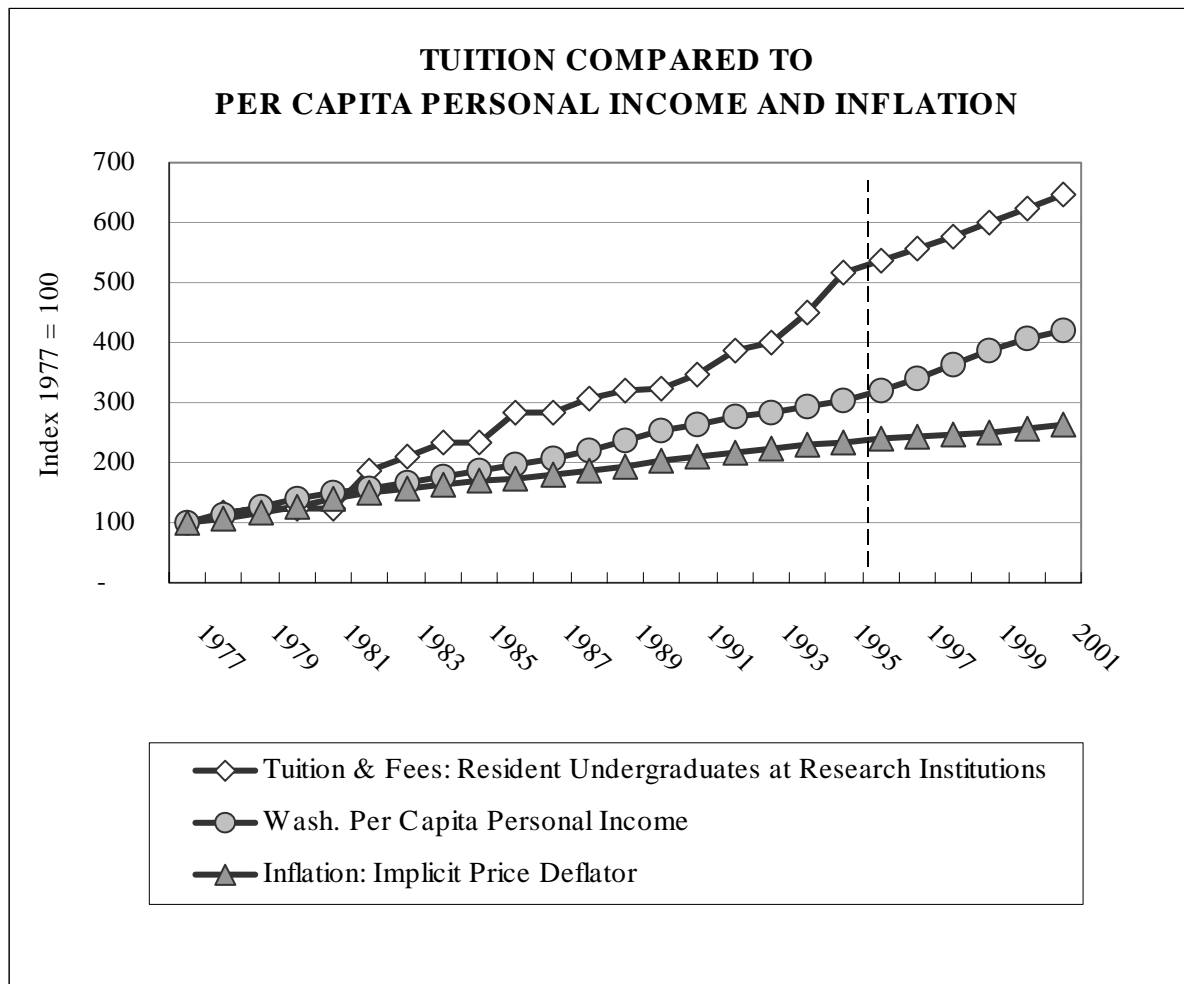

³RCW 28B.15.076.

1999-2001: Legislature Gives Limited Tuition-Setting Authority to Institutions

For the first time, in academic year 2000, the Legislature gave institutions limited local tuition-setting authority, within maximums set by the Legislature and the Governor. The 1999-2001 operating budget provided that tuition could be increased by the institutions by no more than 4.6 percent in the 1999-2000 academic year and no more than 3.6 percent in the 2000-2001 academic year.

Tuition Increases Over Time

The amount of tuition paid by Washington resident undergraduate students has increased significantly since the mid-1970s, and has exceeded increases in the state's average per capita personal income and inflation. The chart below illustrates the relationship between tuition and these other factors.

From 1977 to 1995, tuition grew faster than per capita personal income or inflation; after 1995 tuition has grown at the same pace as per capita personal income.

The following tables illustrate for full-time undergraduate and graduate students who are residents of Washington both the amounts and percentage increases between 1990-1991 and 1999-2001. The first table presents the average tuition and fees for undergraduate students at Washington public research, comprehensive and community college institutions. The second table presents the average tuition and fees for graduate students at the research and comprehensive institutions. Please note that optional technology fees, authorized by the Legislature in 1996, are included.

For the last several years, actual tuition and fees have varied slightly among institutions within each category. However, the variation at any institution is within \$50 of the average shown below.

**RESIDENT UNDERGRADUATE:

10-year Percent Increase		89.4%		76.2%

^ Technology fees instituted.

* Washington State University's tuition and fees are slightly lower than UW since 1996-97.

** The Evergreen State College, although not included in this average, charges tuition and fees similar to comprehensive institutions.

The tables above display rates for full-time resident students, at both undergraduate and graduate levels. The research institutions also charge a higher rate for students in three professional fields: medicine, dentistry, and veterinary medicine. And recently (academic year 1998) a separate rate for law students and MBA students at the University of Washington has been instituted. In addition, considerably higher tuition charges are assessed for students who are not residents of the state. Other related statutory provisions require: 1) a "pro rata" charge for part-time students, generally those enrolled for under 10 credit hours; 2) a minimum charge for two credit hours for students enrolled for one or two credit hours; and 3) and an operating fee surcharge for students enrolled for over 18 credit hours.

Tuition Changes in the 1999-2001 Biennium

Legislative Provisions

In the 1999-2001 biennium, the Legislature specified tuition increases, but allowed institutions some flexibility in the application of the increases. The 1999 Appropriations Act (ESSB 5180, section 601) stated that both two-year and four-year institutions “may implement” an increase for full-time students no greater than 4.6 percent in 1999-2000 and no greater than 3.6 percent in 2000-2001. These percentages could be viewed as a maximum or cap on tuition increases.

Adjustments below the maximum could be made “for factors that may include time of day and day of week, as well as delivery method and campus, to encourage full use of the state’s educational facilities and resources.” Furthermore, increases need not apply uniformly across all student categories as long as increases in individual student categories did not exceed the specified percentages.

Most institutions increased tuition to the maximum allowed in the Appropriations Act, with 4.6 percent in the first year and 3.6 percent in the second year. However, there are exceptions as illustrated below:

PERCENTAGE INCREASES IN TUITION – BY CATEGORY

	Resident Undergraduate		Nonresident Undergraduate	
	1999-2000	2000-2001	1999-2000	2000-2001
UW	4.6	3.6	4.6	3.6
WSU	4.0	3.6	No increase	No increase
CWU	4.6	3.5	4.6	3.5
EWU	3.0	3.5	3.0	No increase
TESC	4.6	3.6	4.6	3.6
WWU	4.6	3.6	4.6	3.6
Community Colleges	4.6	3.6	4.6	3.6
	Resident Graduate		Nonresident Graduate	
	1999-2000	2000-2001	1999-2000	2000-2001
UW	3.0 (except MBA 4.6)	3.0 (except MBA 3.6)	3.0 (except MBA 4.6)	3.0 (except MBA 3.6)
WSU	3.0	3.0	No increase	3.6
CWU	4.6	3.5	4.6	3.5
EWU	3.0	3.5	3.0	No increase
TESC	4.6	3.6	4.6	3.6
WWU	4.6	3.6	4.6	3.6

Note: there is also some variation in professional tuition rates at UW and WSU. Specific professional rates can be found in tables in Section IV.

III. TUITION STRUCTURE AND CONTROL

Components of Tuition and Fees

Often the phrase "tuition and fees" is used to refer to the charges that all students pay to attend a college or university. In Washington's public institutions, "tuition and fees" are composed of specific types: operating fees, building fees, services and activities fees, and technology fees. The actual "tuition" portion, as referred to in statute, consists of operating fees and building fees. Services and activities fees and technology fees are additional. Regarding the technology fees, four-year institutions are permitted to assess this fee; to date, four institutions have done so. In this report, the word "tuition" will usually refer to all major types of fees (operating, building, services and activities, and technology fees). However, for legislation, which specifies "tuition," as is the case currently where allowable tuition increases are specified in statute, tuition refers only to the total of operating and building fees combined.

The "operating fee," which comprises 75 to 90 percent of tuition and fees, is used primarily to fund instructional activities of the institution. The "building fee," which comprises three to nine percent of the total amount depending on the institution, is used for bond retirement and building projects. The "services and activities fee," which represents nine to thirteen percent of tuition and fees, funds student activities and programs, including some bond repayments for student-support facilities, which are not part of the instructional program. In 1996, the Legislature also authorized the four-year institutions to impose "technology fees," up to \$120 per year.

During most of the past decade, the building fee portion of tuition was a fixed dollar amount set in statute. While operating fees increased, the building fee did not. Legislative changes in 1993 provided for increases in the amount of tuition dedicated to building fees. In 1995-1996, the building fee became a percentage of total tuition and fees, rather than a fixed amount and, consequently, increased as overall tuition increased (RCW 28B.15.069).

Services and activities (S&A) fees may increase each year, if a request is initiated by the services and activities fee committee at an institution. S&A percentage increases may not exceed the percentage increase in tuition for the applicable tuition category. (RCW 28B.15.069)

In addition, four-year institutions are permitted to charge a technology fee. To date, four institutions, the University of Washington, Western Washington University, Central Washington University, and Eastern Washington University, charge this fee. The fee, capped at \$120, may be adjusted or abolished with approval of the student government association and the institutional governing board. (RCW 28B.15.051)

The table on the following page illustrates the relationship among the various fees for resident undergraduates.

**COMPOSITION OF TUITION AND FEES
ACADEMIC YEAR 2000-2001
RESIDENT UNDERGRADUATES ENROLLED FULL-TIME**

	Building	Operating	Services & Activities	Technology Fee
University of Washington	168	3,200	263	120
Washington State University	167	3,183	307	
Central Washington University	99	2,388	348	75
Eastern Washington University	99	2,352	339	105
Western Washington University	100	2,390	344	30
The Evergreen State College	100	2,390	367	
Community Colleges	162	1,314	165	

Responsibility for Setting Tuition

In Washington, the Legislature has had the authority to set tuition for several decades. Nationally, there is variation on tuition-setting authority. Ten state legislatures set tuition levels for four-year institutions, and eight maintain this responsibility for their two-year sector. The most common practice, used in about two-thirds of the states, is for the Legislature to delegate tuition-setting responsibility to the system-wide governing board. About one-third of the states vest the authority in the institutional or local governing board and a few states direct the state higher education agency to set tuition levels.⁴

Control of Tuition and Fee Revenues

The use and control of the revenue generated from each of the four components of tuition and fees (building, operating, services and activities, and technology) are different. Operating fees are retained locally and contribute significantly to meeting instruction costs. Building fees are remitted to dedicated accounts in the state treasury to fund designated building projects and make bond repayment. Services and activities fees are retained by the institution in a local institutional account to be used for non-instructional student services. Technology fees are retained by the institution to be used for technology resources for general student use.

⁴ State Higher Education Executive Officers (SHEEO), "State Tuition and Fee Policies, 1996-97." Page 2, March 1997.

Amount of Tuition and Fee Revenues Generated

Washington's 1999-2001 biennial operating budget for all public higher education, both four-year and two-year institutions, includes a total of about \$811 million from operating fee revenues,, the largest portion of tuition and fees. Approximately one-third of total tuition is collected at the community and technical colleges; with the two-thirds collected at the public four-year institutions. The State General Fund is the other major funding source for higher education operating expenses. In the current biennial budget, the general fund portion is about \$2.3 billion.⁵

Tuition at Washington's Technical Colleges

The merger of technical colleges into the community college system occurred in 1991; both are now the responsibility of the State Board for Community and Technical Colleges (SBCTC). Tuition-setting procedures, however, differ between the two types of schools. Following the merger, a SBCTC task force reviewed the tuition process and recommended, with SBCTC approval, that tuition responsibility for the technical colleges should remain at the local level. Technical colleges (and the Seattle Vocational Institute) set tuition and retain it in local accounts. The task force found that this method provides significant flexibility and allows the colleges to make decisions based on local needs.

Each technical college sets tuition locally, based on program costs and market influences. Tuition rates are generally comparable across the technical colleges for similar programs, and also comparable to rates at community colleges.

⁵ Legislative Evaluation and Accountability Program (LEAP), *worksheet*, October 2000.

IV. TABLES

- **Western States (WICHE)**
- **National Comparisons**
- **Peer Institutions**

Western States (WICHE)

Tables 1 through 8 display historical and current academic year tuition and required fee rates for full-time resident and nonresident undergraduate and graduate students at public four-year colleges and universities in the Western states. Tables 9 and 10 display state averages for community colleges in each of the Western states.

*Does not include New Hampshire or South Dakota. **New Jersey reported nonresident rates for the first time in 1999-00.

^Fees reduced. ~Alaska eliminated the nonresident portion of tuition beginning in Fall 1999.

Peer Institutions

Following are data tables comparing Washington institutions to their respective peer groups. Peer groups for Washington comprehensive universities, with the exception of The Evergreen State College, are represented in Tables 5 through 8. Washington community colleges are represented in Tables 9 and 10. All peer comparison tables display peer groups for the University of Washington, Washington State University and The Evergreen State College.

In addition to undergraduate and graduate tuition and fees by respective peer groups, the annual tuition and fee rates survey collects data for professional tuition categories. Tables 9 through 16 provide a comparison of Washington institutions and their respective peer group, beginning with the University of Washington and the professional programs of medical, dental and law. Tables 15 through 16 display Washington State University's Veterinary Medicine resident and nonresident tuition and fee rates as compared to their national peer group.

APPENDICES

Appendix A

Data Methods

All data contained in this report were compiled using Washington Higher Education Coordinating Board surveys of state agencies or individual institutions. Board staff greatly appreciate the continued cooperation and assistance provided by the many respondents to these surveys. Their continued efforts to provide accurate and timely data have helped make these reports source documents for many states in the development of their own tuition and fee analyses and presentations to governing boards and legislatures.

With each annual survey, respondents have an opportunity to review and revise previously reported data. Though small in number, such revisions modestly affect the national averages from those displayed in earlier reports. Revisions may reflect a mid-year surcharge, discontinuation of a nonresident differential, or an adjustment in incidental fees.

Data for the state colleges and universities in Tables 5 through 8 represent the average undergraduate charges at 215 state public institutions and the average graduate charges at 195 of those that offer graduate programs. Although not all public institutions are included in this survey, the averages and changes over time at the same set of institutions offer consistency and the large number of institutions included provides a close approximation to state averages.

Users of the report should note that, for reporting comparability, 45 quarter hours or 30 semester hours were used as the basis for full-time undergraduate students. Full-time graduate students were based on 30 quarter hours or 20 semester hours.

Tuition and required fee charges as collected in the survey include total academic year tuition and required fees for full-time students. Optional fees such as parking or health care are not included unless paid by all full-time undergraduate or graduate students.

Appendix B

Institutions Participating in the Tuition and Fee Survey

ALABAMA

*University of Alabama/Tuscaloosa
Alabama State University
University of North Alabama
Livingston University
University of Montevallo
University of South Alabama

ALASKA

*University of Alaska, Fairbanks
